However, there are others in Malaysia, India, Indonesia, the Philippines, China, Thailand and other Asian countries that also possess unique strengths and competitive edges which may be included for investment.
- The Fund will invest in 2 categories of companies: (i) strong and competitive on a global or regional basis, or (ii) strong within their domestic markets.
- While the main focus will be on long term growth, the Managers will only invest in companies where valuation levels can be justified.

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment.</p>	<p>Refer to paragraph 8 on page 9 of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risks in the Asian markets. <ul style="list-style-type: none"> Prices of the securities that the Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities, which in turn may affect the value of your investment. You have greater exposure to market risks as this is an equity fund. <ul style="list-style-type: none"> The Fund invests in stocks and other equity securities that historically have greater price volatility than bonds and other fixed income securities. This in turn may affect the value or volatility of the Fund. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Fund is not listed and you can redeem only on Dealing Days. <ul style="list-style-type: none"> There is no secondary market for the Fund. All realisation forms should be submitted to the Managers' authorised agents or distributors. You are exposed to liquidity risks in the Fund's investments. <ul style="list-style-type: none"> Investments by the Fund in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be a greater degree of volatility in such markets because of the speculative element, significant retail participation and lack of liquidity. 	
Product-Specific Risks	
<ul style="list-style-type: none"> You are exposed to the risk of investing in a single region. <ul style="list-style-type: none"> Investments in a single region fund may present greater opportunities and potential for capital appreciation but may also be subject to higher risks as they may be less diversified than a global portfolio. You are exposed to foreign exchange risk. <ul style="list-style-type: none"> Where investments are denominated in currencies other than SGD (the denomination of the Fund), exchange rate fluctuations against the SGD may affect the value of Units. The Managers may hedge the foreign currency exposure of the Fund and may adopt an active currency management approach. Foreign currency exposure may not be fully hedged depending on the circumstances of each case, including the outlook, hedging costs and market liquidity of the relevant currency. You are exposed to political risk. <ul style="list-style-type: none"> Investments by the Fund may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls which may be imposed by the relevant authorities in the relevant countries. 	

- **You are exposed to derivatives risks.**
 - An investment in a FDI (including foreign exchange forward contracts and equity index future contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Fund.
